Summary

Security-minded Software Engineer who builds systems that hold up under pressure. Ships **Neo Browser**, a lockdown exam browser trusted for proctored university exams on Windows, macOS and Linux, and builds the layers that keep every exam fair: **native C++ anti-cheat**, tamper and VM detection, **cloud security** and fleet telemetry.

Education

Bannari Amman Institute Of Technology **2021 – 2025**

B.Tech in Artificial Intelligence and Data Science (CGPA: 8.22) *Sathyamangalam, Tamil Nadu*

Work Experience

iamneo *Coimbatore, Tamil Nadu*

Software Engineer, Neo Browser Team (joined as Associate; promoted Apr 2026) **Feb 2026 – Present**

- Core engineer on **Neo Browser**, a cross-platform **Electron** lockdown browser for proctored university exams; shipped **6 production releases** (v2.0.5 – v2.0.10) on Windows, macOS and Linux.
- **Anti-cheat (C++):** detected cheating tools that hide their processes and windows by hooking Windows APIs, using direct system calls – **0 false positives**, **<1%** overhead; added Linux hook, VM and macOS code-signing checks.
- **Exam integrity:** built a **dynamic network whitelist**, synthetic-input detection and screenshot blocking to stop students reaching outside resources during an exam.
- **Flexible updates:** built a remotely controlled update policy that makes each release **mandatory or optional per OS and version range**, delivered through **AWS S3 + CloudFront** auto-updates.
- **Exam platform (Angular, Node.js, GCP Cloud Run):** secured an open real-time notifications service with **JWT** and Google ID-token auth; fixed Linux Wayland proctoring screenshots and the Neo Browser check API.

Associate – Tech Content **Sep 2025 – Jan 2026**

- Built **8 internal tools** (MCQ Generator, Trainer Scorer, LXD Analytics, Asset Manager, License Manager, Trainer Onboard, Signature Generator, Course Automation) in **React, TypeScript, FastAPI, Azure OpenAI**.

Junior Associate – Program Management **Jun 2025 – Sep 2025**

- Built **TrainOps**, a full-stack trainer-management platform (React, Firebase, Mapbox) for scheduling and GPS-verified attendance; managed **client relationships** and provided **on-site support** for training rollouts.

Trainee – Program Management **Jan 2025 – Jun 2025**

- Built a **Selenium**-based automation tool for course creation and management.

Projects

Neo Browser Dashboard – Telemetry Console | *Next.js, TypeScript, ClickHouse, AWS* **2026**

- Co-developed the admin console that monitors the Neo Browser fleet: drill-downs by device, session, user and school, fleet health, version rollout and cheating-detection views.
- Added an **MCP** endpoint so AI assistants can query telemetry, an FAQ editor published through **S3 + CloudFront**, and fixed a **SQL-injection** vulnerability.

MCQ Generator Platform | *Flask, n8n, Azure OpenAI GPT-4o, PostgreSQL* **2025**

- Engineered an **n8n + Azure OpenAI** MCQ pipeline enforcing a strict subject-topic-subtopic hierarchy, in active production use by the Content Delivery team.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, SQL, Bash

Frontend: React, Next.js, Angular, Vite, Tailwind CSS

Backend & Desktop: Node.js, Electron, Node-API (C++ addons), FastAPI, Flask

Security: Anti-tamper & hook detection, VM detection, code signing, JWT / OIDC auth, SQL-injection hardening

AI & Automation: Azure OpenAI, GPT-4o, LLMs, n8n, Selenium

Data & Cloud: PostgreSQL, ClickHouse, Firestore, AWS (S3, CloudFront), GCP Cloud Run, Docker

Tools: Git, GitHub, Linear, Claude Code, Cursor, Figma, Sentry

Achievements

- **Employee of the Month (iamneo) – March & July 2025** for production-ready internal systems.
- **BIT'S HACK'22 Winner** – Rs.10,000 award for a classroom-allocation app in a 24-hour hackathon (Feb 2023).
- **BIT HACK'23 Finalist** – Ride Hailing Service Application (Oct 2023).
